

## Vonem Elip Wireless Access

Vonem ElipServices® - Wireless AccessElipWiFi Provides Secure Wireless Connectivity Solution

- Has the challenge of setting up a wireless network held back deployment within your work environment?
- Are you concerned about the security implications of WiFi at your business, including "snoopers" clogging Internet access or viewing sensitive data?
- Are you confused about how to support such a system?If so, ElipServices Wireless Access solution is the right choice.

An integral component of a Vonem ElipServices solution is Wireless Access, which is immediately available upon receipt of your ElipSwitch1. It will be pre-configured to provide secure wireless access throughout your office, up to 75 feet from the location where you place the device2.

Simply plug in your ElipSwitch to a broadband modem or router and your office is transformed into a secure, wireless enabled workplace environment. It's that easy! As wireless access technologies change over time to address new security or coverage concerns, so too will your ElipServices solution. Delivered as a managed service that includes equipment, ElipServices are "future-proofed" to continue to provide you with the most up to date technology solution at an affordable cost.

### Benefits

- Convenience &ndash; Enjoy the convenience of wireless connectivity and Internet access throughout your office: access your laptop, desktop or printer3 anytime, anywhere
- Security &ndash; ElipSwitches are pre-configured to support WPA, so your wireless access solution is secure &ndash; WEP configuration is an available alternative providing enhanced Internet performance
- Accessibility &ndash; Quickly, easily establish new employee access to the Internet and your network without the use of wires or cabling, saving you time and effort
- Flexibility &ndash; Alternative configuration supports "guest access zone" for visiting consultants, vendors or other third parties, providing Internet access without LAN access4
- Compatibility &ndash; Dual 802.11g and 802.11b support ensures most Internet access devices will work with your wireless access network

1 Internet access through a broadband provider is a pre-requisite of wireless access from an ElipSwitch appliance.

2 Actual performance may vary, depending upon your office layout and wall configurations.

3 Wireless printer access may require wireless hub for printer.

4 Additional charges may apply, depending upon your specific network configuration.
