

Serv-All Basic Plan

Our Serv-All Shared Basic Plan is simplified version of our Signature Shared Plans.

The product's unique platform was designed with security and easy customer migration in mind. The platform delivers a level of security and customer privacy similar to a Virtual Private Server. Initially, Serv-All Basic Hosting is best suited for individuals with little web exposure and need a stable and secure email solution, but the service will expand so that you can easily migrate anyof your groth from a simple site to a much more complex solution. What's more, our servers are housed in Vonem's state-of-the-art data centers and are supported by Verio's global Tier-1 network.
